Description of Proposed Works

Please describe the proposed works

Install EV home charger

The request is to install a small, unobtrusive electric vehicle charge point to support our transition to a lower carbon environment.

The charge point will be attached to the front of the house, on the left hand side of the garage door, it will be untethered (without integrated cables – to minimise the visual impact) and will be less than 0.2 cubic meters. Its colour will be in keeping with the guttering, down pipes and bottom course on the house. When the car is parked the charge point will not be visible from the road.

We intend to get an untethered Ohme ePod, dimensions 230 by 140 by 100mm in black, installed by Octopus Energy.

Transitioning from petrol to an electric vehicle will reduce Co2 emissions and reduce air pollution.
