Description of Proposed Works

Please describe the proposed works

The proposal involves replacing the existing bow window on the front elevation of the property with a bay window. The new design includes an increase in the window's height by approximately 20%, while maintaining the same width and protrusion as the existing structure. To accommodate the new design, the brickwork below the window will extend seamlessly to the ground, ensuring structural continuity and visual balance. The bay window will enhance natural light and improve the internal living environment. The materials and finishes will match those of the existing dwelling to ensure the alteration remains in harmony with the building's appearance and the surrounding streetscape.
